FACILITIES & INFRASTRUCTURE DIRECTORY

for Margaret Elizabeth Wilson

COMING THIS FALL!

A new resource
highlighting suppliers
who provide

- Design/build and engineering services
- Products for building infrastructure
- Plant utilities, plant safety, material handling
- Production software and more

Margaret Elizabeth Wilson
Sunset Foods
1234 Main St.
PO Box 5678
Anytown, Illinois 60611

PMI MEDIA GROUP (ATD)
401 N. MICHIGAN AVE., STE 300
CHICAGO, IL 60611

Presorted Standard
U.S. POSTAGE
PAID
Permit # 583
Schmading, IL 60173

Highlighting exhibitors providing design/
build and engineering services, plus
products for building infrastructure,
plant utilities, plant safety, material
handling, production software and more.

In your hands is a prototype of the new **Facilities & Infrastructure Directory**, to be produced for PACK EXPO Las Vegas 2021. This directory is great news for your company! Here's why:

If you sell **building or plant infrastructure products, items pertaining to plant operations, utilities or ventilation products, or design/build and engineering services**, this directory is an ideal opportunity to promote your company and capabilities in front of your target audience.

We'll be mailing this new resource to professionals who have indicated that they are expanding their plants, plus and other key job titles. Here are some quick facts about the *Facilities & Infrastructure Directory*:

- Mailed to professionals – including pre-registered PACK EXPO attendees – who indicate plans for plant expansion, plus plant managers, plant engineers and select senior engineering and manufacturing management titles
- Mailed distribution is 5,000
- Also deployed by e-mail as a PDF
- Each listing includes company logo, booth number, headline, website URL, brief description and photo
- Directory cover will be personalized with the recipient's name
- Mailed prior to the launch of PACK EXPO International 2020

**Your company listing will make
this new directory even better!**

Please contact your PMMI Media Group sales representative or me for more information about being included.

Best regards,

Wendy Sawtell

SECTION 1

Building infrastructure

N-5267

High-performance doors for food industry

www.dynacodoor.us

M2 Freezer door facilitates the quick movement of people and products in and out of freezer rooms, minimizing temperature loss to save energy, reduce costs, and comply with food safety requirements. Also all-weather roll-up doors and large wind-resistant doors for outside applications.

MiTek
Mezzanine Systems

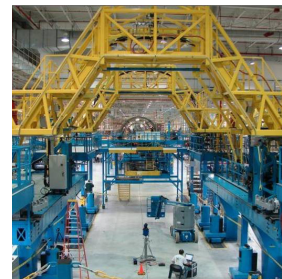

Global Partnerships. Local Solutions.™

LU-8462

Customized mezzanines save space

www.cubicdesigns.com

Steel mezzanines for storage, conveyor support, and maintenance platforms can be a cost-effective way to help expand and maximize your facility space. Elevate equipment to streamline plant operations. Custom designed, modular constructions are implemented within building's footprint and with minimal disruption.

NEWAGE
INDUSTRIAL

LU-8462

Pallet stands, racks, and shelving

www.newageindustrial.com

Full product line of material handling solutions includes ergonomic pallet stand that holds pallets at worker level to reduce worker fatigue. Product line also includes cabinets, carts, racks, and adjustable shelving for facilities, with customizable options available.

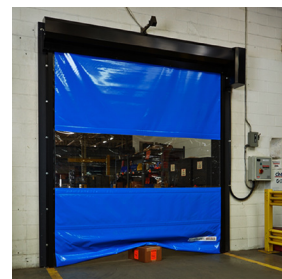

RITE-HITE
ALWAYS LOOKING AHEAD

LL-9803

High-speed doors minimize energy loss

www.ritehite.com

Rite-Hite has a large collection of high performance, high speed door solutions in roll-up and bi-parting designs. Capable of moving at 100 inches per second (2.5 m/sec), doors maximize energy savings by minimizing the amount of air that can escape during open and close.

ROSS
Technology for
Stronger, Safer Solutions

N-5367

Anti-slip flooring reduces risk

www.rosstechnology.com

Slip-resistant flooring creates safe working and walking surfaces for your facility. Metal floor plates feature substrates that combine bond strength and deposit coverage for durability and slip resistance. Smooth surfaces between deposits prevent dirt and debris buildup for easy cleaning.

COMBiLiFT
LIFTING INNOVATION

LL-10219

Multi-directional, 3-in-1 forklifts

www.combilift.com

The Combi C-series of forklift trucks is designed for productivity, safety, and reliability when handling long and specialized loads. Improves workflow by effectively becoming three forklifts in one – sideloader, counterbalance, and narrow aisle forklift. Multi-directional forklift trucks help eliminate costly double handling of material.

 **Dude Solutions®**

LL-9333

Work smarter with integrated operations software

www.dudesolutions.com

CMMS solution provides data insights to better manage equipment maintenance and keep operations running at peak efficiency. System, integrated with mobile solutions and ESRI GIS mapping, facilitates streamlined management of work orders.

Quality made in Germany
haaga

LL-10731

Industrial sweepers clean large areas fast

www.haaga.com

Three-brush sweeping machines can clean large industrial areas fast and efficiently. Several models are available both in manual or battery-powered operation types. Sweepers are equipped with two special filters that help to eliminate dust.

 **HUSKY**
RACK & WIRE™

N-5860

Pallet racks for demanding applications

www.huskyrackandwire.com

Pallet rack manufacturer produces its own wire decking engineered to the performance demands of professional material handlers. Wire deck comes in several designs, covering a variety of capacity and application needs.

TAWI

S-4375

Vacuum lifter for boxes up to 110 lb

www.tawi.com

TAWI VacuCobra vacuum lifters facilitate fast material handling. One-handed grip is easy to operate, allowing an operator grip boxes from the top or the side and maintain a high lifting frequency without straining. Vacuum lifter is available in four models, with a 45- to 110-lb lifting capacity.

MIURA

LL-9917

Industrial steam boilers

www.miuraboiler.com

Miura's modular boiler installations are a major asset to food companies seeking to maximize operation efficiency and cut energy costs. Whether you're a vegetable processor, poultry plant, or a dairy processor, modular boilers allow greater flexibility for food processing companies to turn boilers on or off as needed, as well as meet steam demand at the greatest efficiency during peak hours.

Atlas Copco

LL-9835

Oil-free air compressor

www.atlascopco.com

Oil-free centrifugal air compressor provides a combination of high flow and low energy consumption. All elements, including internal piping, coolers, motor, lubrication, inlet guide vanes, and control system, are supplied in a standard package. Designed for automation air and cooling/spraying on filling, packaging and bottling lines.

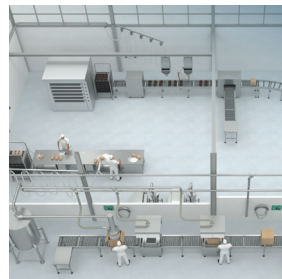

Healthy Business
Dustcontrol

LU-7665

Centralized vacuum systems for food

www.dustcontrol.us

Plant-wide vacuum systems utilize stainless steel tubing that make it easy to alter and add additional runs. Joints feature a hygienic design, and are easy to mount and alter. Pre-separator enables efficient re-use of material. FDA-approved for food contact.

EIPL
INC

Wide range of industrial dehumidifiers

www.ebacusa.com

Line of pre-engineered dehumidification solutions includes the EIPL CS60 commercial/industrial dehumidifier, designed for energy efficient humidity control. Industrial dehumidifiers

**DENNIS
GROUP**
N-6334

Food and beverage industry design/build specialists

www.dennisgroup.com

Process design engineering firm focuses solely on food and beverage industry. Specialists cover all aspects of executing a project, from planning through start-up. Firm considers architectural, mechanical, electrical, environmental, controls, and packaging factors.

Gray

Engineering
Architecture
Construction

LU-8745

Building state-of-the-art packaging facilities

www.gray.com

Firm is fully equipped to design and build state-of-the-art food processing and packaging facilities. Recent projects have included buildings for leading food and beverage companies. All project disciplines are in house, from preliminary design to final construction.

HANSEN-RICE
LU-8959

Integrated design-build contracting for food industry

www.hansen-rice.com

Construction contracting firm offers integrated design and build services for the food and beverage industry for FSMA compliance. Integrated design-build approach to construction projects comprise full design and engineering, pre-construction, and construction solutions.

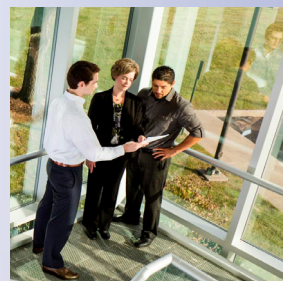

**Matrix
Technologies**
INCORPORATED

LU-8428

Full-service automation and engineering firm

www.matrixti.com

Matrix Technologies has six U.S. offices and has installed facilities in 45 countries. To implement automation successfully, its award-winning delivery process factors in equipment, manufacturing process, and specific control capabilities needed to run equipment.

TIPPMANN GROUP
N-5663

Design/build for cold storage and food processing

www.tippmanngroup.com

Specializing in food processing plants and refrigerated facilities, firm focuses on building, expanding, renovating, and improving multi-temperature distribution and processing facilities. Services also include site selection, evaluation, and acquisitions.

Past PACK EXPO attendees are excited about this new directory and agree it's long overdue.

Here are some of their comments:

"I am really interested in the facilities and infrastructure suppliers at PACK EXPO; I spend at least a day trying to visit these guys ... **If I had a directory, it would help me know who to focus on.** If I were a supplier and I were paying to be at PACK EXPO, I would want to be able to stand out and be seen I think this directory is a really novel idea."

Former VP of Engineering at Kraft foods, currently food & beverage consultant

"A directory like this would be useful because **if you are looking for these types of companies, they are all dispersed across PACK EXPO ...**"

Senior manufacturing VP at a growing company with 13 plants

"This directory would be useful. I'd like a description of what each company does, what kinds of products or services they provide."

VP of Engineering at a company that makes salad dressings and dips

"These types of services and products are much harder to qualify than equipment. I ended up using local flooring guys when I couldn't find a food-grade floor company and that was a mistake. **There are always building projects in my plant.** I have six active projects that I need to find suppliers or contractors for right now. Building services is way bigger than most people think - bigger than the equipment."

President of a growing company in the high-pressure processing space

COMING THIS FALL

FACILITIES & INFRASTRUCTURE DIRECTORY FOR PACK EXPO LAS VEGAS 2021

A new resource highlighting suppliers who offer:

- Design/build and engineering services
- Products for building infrastructure
- Plant utilities, plant safety, material handling
- Production software and more

5000 printed directories will be mailed before PACK EXPO

International to:

- Pre-registered attendees who indicate plans for plant expansion
- Plant managers, plant engineers
- Select senior engineering and manufacturing management titles
