Your PACK EXPO International Personalized Reference Guide

By Jim Pittas, President & CEO, PMMI

Thank you for being a part of PACK EXPO International, making this year's show not only a success but also the largest in its history! We hope your experience was both productive and enlightening, allowing you to forge valuable connections, explore new innovations, and witness cutting-edge technology firsthand.

As a token of our appreciation and to help you continue to benefit from your time with us, we are pleased to present you with *Second Look* — your personalized reference guide based on the categories you selected when you registered for PACK EXPO International.

This custom guide aims to serve as a recap of the technologies you encountered at the show, while also highlighting innovative solutions you might have missed. Whether it's a refresher on what you saw or an introduction to new possibilities, *Second Look* is designed to enhance your understanding and appreciation of the latest packaging and processing technologies.

Please note that this guide only includes exhibitors related to your specified interests who have opted to participate in this follow-up opportunity. For a complete list of exhibitors at PACK EXPO International, please visit packexpointernational.com.

We are excited to continue this journey with you at future PMMI events, including the debut of **PACK EXPO Southeast** (March 10–12, 2025; Atlanta) and the return of **EXPO PACK Guadalajara** (June 10–12, 2025; Guadalajara, Mexico) and **PACK EXPO Las Vegas** (Sept. 29–Oct. 1, 2025; Las Vegas).

Thank you once again for joining us in Chicago. We value your participation and look forward to welcoming you to future events, where you can continue to explore and witness the newest advancements in our industry.

Sincerely,

A handwritten signature in black ink that reads "Jim Pittas". The signature is fluid and cursive, with the first name being more prominent.

Jim Pittas
President & CEO, PMMI

EZ20 Vertical Bagger

Miscellaneous Solution • Up to 25 bags per min. • EZ20

The all new electric EZ20 bagging solution from Rennco provides the mighty power of our bagging solutions into a small, yet versatile, footprint. Our EZ20 model is designed to provide a superior packaging solution for customers who are hand bagging or using pre-made bag systems. The EZ20 offers a significant cost savings over pre-made bags, utilizing centerfolded film to create custom bags tailored to your needs.

INFO pe.show/skimpel/35

ProCommerce Vertical Bagger

E-Commerce Solution • 10-15 bags per min. • ProCommerce

The ProCommerce bagging solution utilizes flat stock material offering cost savings over pre-made bags. The ProCommerce system can run opaque mailing film and/or bubble mailing material. Each package is "right sized" based on the product being bagged thus advancing the correct length to minimize material used. A shipping label can be automatically attached to the package. Individual or multiple items can be loaded based on your particular application.

INFO pe.show/skimpel/37

301 Vertical Bagger with Pocket Conveyor

Miscellaneous Solution • 35-55 bags per min. • 301

The 301 series is a versatile packager that is easy to operate and includes a user friendly HMI screen for ease in product change over. With a wide range of available options, the Vertical L Bar 301 packager is your solution to package your products in centerfolded roll stock material versus high cost pre-made bags.

INFO pe.show/skimpel/39

Vertical Cup Counter / Loader (VCCL)

Food Service Disposable Solution • 350 cups per lane, per min. • VCCL

The Rennco Model VCCL (vertical cup counter/loader) is available with one to four lane designs. The system can handle single and double poly coated paper and clay coated cups. The product is typically fed into the vertical "tower" system with the mouth of the cup leading. In standard applications, the diameter of the cup should not exceed the overall height of the cup. The VCCL towers count, accumulate and transfer the stack of cups to either a single or dual seal assembly vertical L bar sealer.

INFO pe.show/skimpel/38

Rennco, a ProMach brand, is a leading manufacturer of vertical packaging machinery and automation for various markets including Food Service Disposables, E-Commerce, and Commercial Laundry. We are also a market leader in heat sealing equipment for medical devices. For more than 50 years, our customers have depended on Rennco for delivering innovative solutions to improve production throughput while reducing labor costs.

Homer, MI • (517) 568-4121

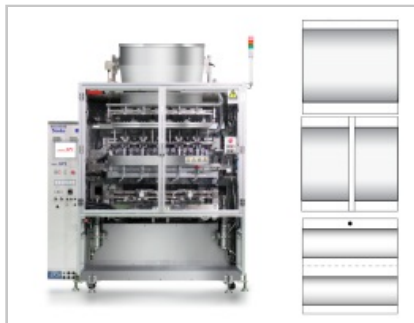

Hi Sandra, We had a great time at PACK EXPO but we missed seeing you. Let's schedule a time to connect to discuss our latest solutions! Rennco@ProMachBuilt.com

T.H.E.M./Sanko North America

Years in business: 51+ • Employees: 110+

Type in the [URLs](#) below to view product [INFO](#) or [VIDEOS](#) from this featured PACK EXPO International exhibitor.

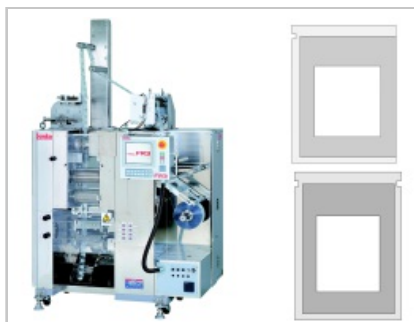

Unparalleled throughput for snack applications

Multi-lane pillow pack • 400 bags/minute • SP-1

New to North America, the SP-1 is here to supercharge production with up to four lanes of reliable, quality packaging. Especially valuable for high volume snacks, such as cookies, chips, and nuts. Also great with powders and granules. Pillow packs can be display-ready with a perforated tag and hole punch option.

[INFO](#) pe.show/skimpel/51

High-performance for liquids and pastes

Single or multi-lane sachet • 600 sachets/minute • FR-3

Handle a wide range of liquid and paste viscosities with your choice of single or multi-lane. Can be configured without any extra tooling to fill from 1mL to 500mL in three- or four-side seal sachets with virtually zero headspace. Save plant floor space with unparalleled speed in one machine.

[INFO](#) pe.show/skimpel/53

The best-selling stick pack machine in the world

Multi-lane stick • 110 sticks/min per lane • FC-1000

The FC-1000 offers competitive speed across multiple lanes, enabling your business to grow and scale reliably. It has delivered billions of high-quality units to shelves in North America. Options for liquid/paste and dry versions available.

[VIDEO](#) pe.show/skimpel/54

Small volume solutions

One or two lane stick • 70 sticks/min per lane • FC-80

Can be equipped with multiple fillers for versatility throughout years of production. Robust and easy maintenance makes this an excellent first machine, small volume, or pilot plant option. Liquid and dry versions available.

[INFO](#) pe.show/skimpel/52

T.H.E.M. / Sanko North America specialize in both co-packing and equipment sales for single-serve applications. We provide best-in-class solutions for liquid, powders, pastes, and granules. Our contract packaging capabilities support your production to scale, with world-class safety and quality standards. We are a trusted partner for the brands you know and love. For businesses ready bring packaging in-house, our machinery is best-in-class, easily maintained, and reliable for decades.

Marlton, NJ • (800) 322-8436

Hello Sandra, sorry we missed you at PACK EXPO. We'd love to connect and discuss how our machinery can help scale and streamline your single-serve business.
